Subject: RE: Revised Air Sampling plan
Air SAP v 2.1_.pdf

All,

Version 2.1 of the air sampling plan is attached for your review. This version removes real-time air monitoring for total VOCs and benzene from the community. This change would also eliminate minican air sampling at AS04.

Thanks,

-Wesley

Subject: Revised Air Sampling plan

Gentlemen,

Attached is a revised Air Sampling Plan for review. We have modified the plan because the fires have been extinguished and preliminary monitoring has eliminated some potential hazards. The main modifications are as follows:

- *Silica method changed to Mod. NIOSH 7603 Grav/IR*
- *Combustion products removed except for CO in the work zone*
- *Added PM₁₀ for dust particulate*
- *SO₂, asbestos, aldehydes, PAHs, metals removed from potential analytical analysis*
- *Ammonia, HCl, Amines, removed from monitoring.*
